Patent 1 - Protection from interfering fields

Device to influence electrical and magnetic fields with low frequencies

Patent No: EP O 621 795 BI Patent application: 11.9.1993

- Wherever there are electrical cables in the air, earth or buildings, electrosmog exists. This can cause so-called energy diseases, which in turn can cause chronic diseases.
- While infectious diseases decreased more and more during the last I00 years, chronic disease rose rapidly (also due to energy deficits).
- The healing frequencies of natural magnetic fields do not stand a chance against the electrosmog fields, the self healing processes of the body are blocked.
- The quantronic therapy system intervenes by supplying the body again with vital energy.
- Such artificially generated healing magnetic fields only have an effect if a reduced-field was generated In the room first.
- This means that the existing electrosmog has to be reduced to a minimum. Because If therapeutic frequencies are mixed with the electrosmog, they have a far from healing effect.
- QRS is the only manufacturer who considers this and has internationally patented the “50 HZ electrosmog killer" in connection with quantronic therapy.
